General Comment

To Whom It May Concern,

I am writing to voice my OPPOSITION to the building of a nuclear power plant on the Clinch River.

We know that the country needs to transition away from fossil fuels but that certainly doesn't mean we have to replace it with an energy source that is just, if not more, dangerous to the people who live in and around such a facility, or along the highways needed to transport the waste.

I do not think this is the correct solution.

Thank you.
