  3. ED20150112, Submission of NAC-LWT Safety Analysis Report (SAR), Revision 44 Incorporating Highly Enriched Uranyl Nitrate Liquid (HEUNL) and the SLOWPOKE Fuel Core Approved Application, August 18, 2015
  4. ED20160104, Submission of a Request for a Revision to Certificate of Compliance (CoC) No. 9225 for the NAC-LWT Cask Incorporating Changes to the Authorized NRU/NRX Fuel Content, December 23, 2016
  5. NRC Letter, Request for Additional Information for Review of the Model No. NAC-LWT, April 7, 2017
  6. ED20160047, Submission of NAC Responses to NRC's Request for Additional Information to NAC's Request for Certificate of Compliance (CoC) No. 9225 for the NAC-LWT, May 15, 2017

NAC International (NAC) hereby submits a supplement to the request for a revision to Certificate of Compliance (CoC) No. 9225 for the NAC-LWT (Reference 4). Drawing 315-40-172 has been revised by adding a note that refers to the CoC for specifying under what circumstances the NRU/NRX lid assembly is to be used with or without the mesh (Drawing Item 2) installed for each fuel tube location when transporting NRU/NRX fuel. The proposed CoC changes now specify that the mesh is required for each fuel tube location that is transporting damaged fuel. This drawing revision did not result in any changes to SAR with exception to the list of license drawings. Note, this drawing does not contain any proprietary information.

Approval of the NAC-LWT CoC is requested by June 30, 2017 in support of anticipated NAC-LWT transport projects. In accordance with NAC's administrative practices, upon final acceptance of this application, the NAC-LWT SAR Revision 16B and 17A changed pages will be reformatted and incorporated into the next revision of the NAC-LWT SAR.

If you have any questions regarding this letter, please feel free to contact me on my direct number at 678-328-1236.

Sincerely,

Wren Fowler  
Director, Licensing  
Engineering
