Mr. Bradley Y. Jenkins
Vice President, Power Supply Generation
Portland General Electric
121 SW Salmon Street
Portland, OR 97204

SUBJECT: APPLICATION FOR RENEWAL OF THE TROJAN INDEPENDENT SPENT FUEL STORAGE INSTALLATION LICENSE NO. SNM-2509 – ACCEPTED FOR REVIEW (CAC NOS. L25208 AND L25209)

Dear Mr. Jenkins:

By letter dated March 23, 2017, Portland General Electric Company (PGE) submitted an application for renewal of License No. SNM-2509 for the Trojan Independent Spent Fuel Storage Installation. The current license expires on March 31, 2019. The submittal of the renewal application was timely per the requirements of 10 CFR 72.42(b). In the application, PGE requested to renew the license for an additional 40 years. U.S. Nuclear Regulatory Commission (NRC) staff performed an acceptance review of your application to determine if the application contains sufficient technical information in scope and depth to allow the staff to conduct the detailed technical review.

This letter acknowledges acceptance of your application. The application appears to contain the information needed for the NRC staff to conduct a detailed technical review. We have established a schedule for the review. The schedule allows for the staff to complete its technical review and issue a request for additional information (RAI) in September 2017 and the license renewal in May 2018, based on you responding to the RAI in November 2017. If no RAI is needed, and based on the staff's evaluation, the approval may be issued at an earlier time. If an additional RAI is needed, the staff will keep you informed of any schedule changes. In general, no additional changes to the application should be submitted except for changes resulting from your response to an RAI.

B. Y. Jenkins
