Mr. Gurdziel,

The NRC has received your email addressed to CHAIRMAN Resources regarding Vogtle New Construction. Many of the issues you address are not within the purview of the U. S. Nuclear Regulatory Commission. However, the inspection and assessment of work activities on safety-related components is, as well as the verification of the licensee's readiness to operate an AP-1000 facility. I am providing a quick link to the NRC's program for overseeing new construction under [10 CFR Part 52](#), "Licenses, Certifications, and Approvals for Nuclear Power Plants". Also Mr. Roger Hannah is available to address questions you may have. Mr. Hannah is the Region II senior public affairs official. He can be reached at [Roger.Hannah@NRC.gov](mailto:Roger.Hannah@NRC.gov) or (404) 997-4417. The NRC website regarding new construction activities is <https://www.nrc.gov/reactors/new-reactors.html>.

Respectfully,

William B. Jones Director  
Division Construction Oversight  
Region II  
(404) 997-4200
