RE: Discontinuance of Tripolyphosphate Injection Pilot Testing

Dear Sirs:

This letter is to notify you that Homestake Mining Company of California (HMC) is no longer proposing to perform additional pilot testing of Tripolyphosphate (TPP) injection at the Grants Reclamation Site. In the future, if advances in this form of technology suggest improvement, HMC may choose to re-evaluate the application of TPP for removal of dissolved-phase uranium from the alluvial aquifer.

If you have any questions, please contact me at twohlford@homestakecoca.com or by my cell phone: 505.290.2187.

Respectfully,

Thomas Wohlford
Interim Closure Manager
