Subject: [External_Sender] SMRs are not good for TVA and for Citizens of Tennessee

Follow Up Flag: Follow up
Flag Status: Flagged

Nuclear power is more water intensive than wind, solar and energy efficiency and conservation. It also produces highly radioactive nuclear waste. SMRs need disposal sites to contain this highly radioactive waste, but there is no safe management and **no safe permanent storage for this waste. Why choose such dangerous waste from SMRs, when wind, solar, energy efficiency and conservation measures already exist and are effective.**
