**Subject:** [External\_Sender] Clinch River Site

Hello,

I urge you to not go forward with the Clinch River Site. These reactors are **not needed** and are **extremely expensive**, with no actual approved reactor designs. SMRs are significantly **more water-intensive than clean energy choices** such as wind, solar and energy efficiency and conservation. And just like existing nuclear power plants, **they produce long-lived, highly radioactive nuclear waste** for which no safe management and permanent storage existing storage.

Thanks,

Damon Sgrignoli  
(Atlanta, GA)
