**Subject:** [External\_Sender] Opposition to Clinch River

As a resident of Western NC and manager of a local farmers market, I oppose the proposition of nuclear reactors on the Clinch River.

These reactors are not needed and are prohibitively expensive when compared with clean renewable solar and wind power. What's more, TVA is seeking site approval before the reactor designs have even been studied, much less approved. SMRs are significantly more water-intensive than clean energy choices such as wind, solar and energy efficiency and conservation. And just like existing nuclear power plants, they produce long-lived, highly radioactive nuclear waste for which no safe management and permanent storage exists.

Please look into other forms of clean and renewable energy and do not place nuclear reactors near the Clinch River.

Warmly,

L. McBride  
Market Manager
