SUSQUEHANNA STEAM ELECTRIC STATION
REVISION TO SCHEDULE - PROPOSED AMENDMENT NO. 71
ER 100450 FILE 841-8
PLA-2579

Docket No. 50-387

Dear Ms. Adensam:

We have reevaluated the implementation schedule which we requested as part of Proposed Amendment No. 71 to License No. NPF-14. As a result, we hereby request that you hold the proposal in abeyance until one month prior to the beginning of the third refueling and inspection outage of SSES Unit 1; our current plant is to install the modification during that outage.

This decision does not impact any standing regulatory commitment; as stated in the original proposal, the subject modification was being performed to enhance the capability of the non safety-related drywell cooling system.

Any questions on this request should be directed to Mr. R. Sgarro at (215) 770-7855.

Very truly yours,

H. W. Keiser
Vice-President - Nuclear Operations
