PROPOSED AMENDMENT 34 TO NPF-22:  
IMPLEMENTATION CHANGE  
PLA-2669                      FILES A17-2, R41-2

Docket No. 50-388

Reference: PLA-2602, H. W. Keiser to E. Adensam, dated March 27, 1986.

Dear Ms. Adensam:

The purpose of this letter is to request that Proposed Amendment 34 to License No. NPF-22 (see Reference) be held in abeyance due to a decision we have made not to perform the associated modifications on the Drywell Cooling system during the Unit 2 first refueling and inspection outage. These modifications were considered operational enhancements and were not part of any outstanding regulatory commitment.

This modification will probably be performed during the Unit 2 second refueling and inspection outage; we will update you on the exact schedule as it evolves.

Any questions on this request may be directed to Mr. R. Sgarro at (215) 770-7855.

Very truly yours,

H. W. Keiser  
Vice President-Nuclear Operations
