SUBJECT: SUMMARY OF THE STAFF'S REVIEW OF GLOBAL NUCLEAR FUEL-
AMERICAS RESPONSE TO REQUEST FOR SUPPLEMENTAL INFORMATION

Dear Mr. Hilton:

The U.S. Nuclear Regulatory Commission (NRC) staff issued Generic Letter (GL) GL-2015-01, "Treatment of Natural Phenomena Hazards in Fuel Cycle Facilities," (Agencywide Documents Access and Management System [ADAMS] Accession Number ML14328A029) on June 22, 2015. The NRC staff issued a Request for Supplemental Information (RSI) to Global Nuclear Fuel-Americas (GNF-A) on February 16, 2017 (ADAMS Accession Number ML17044A038).

On April 24, 2017, GNF-A provided the formal response to the RSI (ADAMS Accession Number ML17115A097). The NRC staff has completed its review of the response to the RSI. The enclosure to this letter provides the results of the NRC staff review and is intended to provide clarity on the areas where supplemental information is needed. The NRC recommends a conference call to discuss any questions regarding the staff's evaluation of GNF-A's RSI response and to discuss the overall path forward for closing GL-2015-01.

In accordance with Title 10 of the *Code of Federal Regulations*, Section 2.390 of the NRC's "Agency Rules of Practice and Procedure," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records component of NRC's ADAMS. The enclosure contains sensitive information and will not be available to the public. ADAMS is accessible from the NRC Web site at: <http://www.nrc.gov/reading-rm/adams.html>.
