PLE- 9794

Dear Mr. Ptashinski:

Per a telephone conversation with Mr. R. Sager of your staff on September 11, 1987, this correspondence is to confirm removal of a drinking water posting from the domestic water system at the Susquehanna Steam Electric Station. The posting was established under an earlier correspondence (PLE-9738, September 26, 1987) to allow temporary tie-in of the well supply (PWS ID 2400994) to the surface water system (PWS ID 2400998).

As requested by the Pennsylvania Department of Environmental Resources, two samples of the drinking water were collected following the return of the surface water system to normal operation. The results of both samples indicated less than one total coliform/100 ml in the drinking water. A copy of the drinking water posting is attached for your information.

If you have any questions, please contact me at (215) 770-7891.

Respectfully yours,

Curtis H. Saxton
