Docket Nos. 50-387  
and 50-388

Dear Dr. Butler:

At the meeting on November 5, 1987, the request for additional information contained in the September 28, 1987 letter from your staff on postulated pipe ruptures in the Susquehanna SES Reactor Recirculation System was discussed. The additional information requested was in response to our October 17, 1986 letter in which specific exemptions were requested for postulated jet impingement forces. Our basis for this exemption at the time of submittal was the utilization of NRC guidelines contained in NUREG 1061 Volume 3.

As a result of the meeting it was concluded that our prior submittal had been reviewed against the proposed revisions to Standard Review Plan 3.6.3 rather than as a specific exemption. It was agreed in the meeting that the staff would pursue a re-review of our prior submittal and that a response to the letter dated September 28, 1987 was not required at this time.

Please contact us should you require additional information.

Very truly yours,

H. W. Keiser  
Vice President-Nuclear Operations
