MEMORANDUM FOR:

US Nuclear Regulatory Commission
Region III
2443 Warrenton Rd, Suite 210
Lisle, IL 60532-4352

REFERENCE: Request for Amendment for Adding Sealed Source Maximum Amounts to our Materials License for: Anderson Engineering, Inc., 2045 W. Woodland St, Springfield, MO 65807
Licensee: 24-20063-01

We request to amend our license for licensed material by increasing the sealed source maximum quantities:

From:

6. C. Cesium-137, Sealed Sources (CPN, Model CPN-131) 10 millicuries per source, and 30 millicuries total For use in CPN Model MC Series PORTAPROBE

6. D. Americium-241, Sealed Sources (CPN, Model CPN-131) 50 millicuries per source, and 150 millicuries total For use in CPN Model MC Series PORTAPROBE

To:

6. C. Cesium-137, Sealed Sources (CPN, Model CPN-131) 10 millicuries per source, and 60 millicuries total For use in CPN Model MC Series PORTAPROBE

6. D. Americium-241, Sealed Sources (CPN, Model CPN-131) 50 millicuries per source, and 300 millicuries total For use in CPN Model MC Series PORTAPROBE

We are looking to acquire new nuclear testing gauges and need the license amended to be authorized to store them.

John T. Snider
