Mr. Donald K. Davis, Acting Chief
 Operating Reactors - Branch 2
 Division of Operating Reactors
 U.S. Nuclear Regulatory Commission
 Washington, DC 20555

REGULATORY DOCKET FILE COPY

Subject: Dresden Station Units 2 and 3
 Quad-Cities Station Units 1 and 2
 Spent Fuel Storage Pool Modification
NRC Docket Nos. 50-237/249/254/265

Reference (a): G. J. Pliml letter to D. L. Ziemann,
 dated September 29, 1976.

Dear Mr. Davis:

Reference (a) contained a tentative "Summary of Nuclear Station Refueling Schedules" which indicated a twelve month operating cycle. Since that time, we have changed our planned operating cycle interval to eighteen months. This value will alter the number of fuel assemblies replaced at each refueling outage. This information has previously been transmitted by telecon to your staff.

Please direct any additional questions concerning this matter to this office.

Very truly yours,

M. S. Turbak
