Ron

Uranium One anticipates submittal of a Final Status Survey Report for Mine Unit 1-9 by September 30, 2017.

If you need any further information please let me know.

Regards,

Scott Schierman | HSE Manager

Subject: RE: Irigaray Mine Units 1-9 Final Status Decommissioning Report

Scott:

Thank you for the update and response to our February, 13, 2017, letter. Please provide me with a specific date that Uranium One anticipates submitting the Final Status Survey Report. If Uranium One anticipates slippage of the submission date after field work and analysis is completed, Uranium One can provide NRC an update at that time. Let me know if you have questions.

Thank you.

Ron

Subject: [External_Sender] Irigaray Mine Units 1-9 Final Status Decommissioning Report

Ron

As discussed on May 16, 2017 and in response to your letter of February 13, 2017 requesting a proposed schedule for completion of surface decommissioning at Irigaray Mine Unit 1-9. Uranium One has determined that rather than continue the decommissioning process with the limited gamma survey information that is currently available for Mine Units 1-9, Uranium One will get a proposal from a contractor to re-survey the Mine Unit 1-9 area so activity levels can be established for each 100 m² grid. Once this survey has been completed this will identify if additional cleanup is needed in any of the 100 cm² grid locations. Uranium One will follow the current NRC approved decommissioning plan referenced in License Condition 9.3 of Materials License SUA-1341. Once a schedule has been established with the contractor for performing this work Uranium One will inform the NRC of this schedule. Uranium One anticipates this work will be completed and NRC provided a Final Status Survey report in the fall of 2017.

The Final Status Survey Report will include a re-survey of the residual activity associated with the two buildings and will again follow the approved decommissioning plan as outlined in License Condition 9.3 of Materials License SUA-1341. Uranium One will confirm with our contractor the schedule for completion of this activity keep NRC informed of the schedule for completion of this work. Uranium One anticipates this work will be completed in the fall of 2017.
