Reference: K. A. Ringer letter to J. G. Keppler
 dated May 15, 1986

Dear Mr. Davis:

The referenced letter transmitted our response to I.E. Bulletin 85-03. Included in the response, Attachment B, Action Item d, was a statement that procedures were presently under review in order to assure that switch setting procedures were effective and reflect applicable industry recommendations. We also gave a completion date for these reviews and necessary revisions of September 1, 1986. The I.E. Bulletin did not request this completion date, nonetheless, we provided a date based on our projected schedule. Since that time we have experienced delays in reviewing and revising the procedures. As a result, the completion date needs to be revised to September 1, 1987. This date should be acceptable because completion of the total program will not be extended beyond the original date listed in the Bulletin.

I discussed this revised completion date with Mr. P. Wohld of your staff on April 21, 1987. He agreed that this revised date was acceptable.

Please direct any questions regarding this issue to this office.

Very truly yours,
