

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
REGION III  
2443 WARRENVILLE ROAD, SUITE 210  
LISLE, ILLINOIS 60532-4352

**MAY 26 2017**

Annie Kalapparambath, M.D.  
Radiation Safety Officer  
Crittenton Hospital Medical Center  
1101 W. University Drive  
Rochester, MI 48307

Dear Dr. Kalapparambath:

Enclosed is Amendment No. 76 to your NRC Material License No. 21-13562-01 in accordance with your request.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

If you have any questions concerning this amendment please contact me at either (630) 829-9841 or (800) 522-3025, ext. 9841. My fax number is 630-515-1078. My email address is colleen.casey@nrc.gov.

By letters dated February 2, 2017, February 17, 2017, April 26, 2017 and May 22, 2017, Ronald Stewart, D.O. and your management's representatives ("you") submitted to the U.S. Nuclear Regulatory Commission (NRC) a Request for Consent to Direct License Transfer of NRC Materials License No. 21-26489-01.

Based on the information that you and Dr. Stewart provided, we understand that as a result of the asset purchase and integration agreement between Ronald Stewart, D.O. and Crittenton Hospital Medical Center, control of Ronald Stewart, D.O. was directly transferred to Crittenton Hospital Medical Center.

We further understand that, except as noted, this transfer has not resulted in any change to the licensed materials, persons using the licensed material, location of use of licensed material, or persons responsible for the licensee's radiation safety program. Two authorized users were added to the license and one authorized user was deleted.

The licensee's name has now changed from "Ronald Stewart, D.O" to "Crittenton Hospital Medical Center" for the newly added location of use.

In letters dated February 2, 2017, February 17, 2017, April 26, 2017 and May 22, 2017, you requested the termination of License No. 21-26489-01 concurrent with the merger of this license into NRC License No. 21-13562-01 for Crittenton Hospital Medical Center.

License No. 21-26489-01 has been terminated at this time, concurrent with its merger into NRC License No. 21-13562-01 for Crittenton Hospital Medical Center.

Dr. Stewart and the RSO for his license, Saba Darda, M.D., have been provided with the licensing documents terminating License No. 21-26489-01 under separate cover.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you.

This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions.

Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>.

We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

Sincerely,

Colleen Carol Casey  
Materials Licensing Branch

License No. 21-13562-01  
Docket No. 030-02157
