License No. 37-20584-01
Docket No. 030-19945
Control No. 109851

Valley Forge Laboratories, Inc.
ATTN: Ward McMasters
Managing Director
6 Berkeley Road
Deven, Pennsylvania 19333

Gentlemen:

Please find enclosed an amendment to your NRC Material License.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the Region I Material Licensing Section, (215) 337-5239, so that we can provide appropriate corrections and answers.

Please be advised that you must conduct your program involving licensed radioactive materials in accordance with the conditions of your NRC license, representations made in your license application, and NRC regulations. In particular, please note the items in the enclosed, "Requirements for Materials Licensees."

Since serious consequences to employees and the public can result from failure to comply with NRC requirements, the NRC expects licensees to pay meticulous attention to detail and to achieve the high standard of compliance which the NRC expects of its licensees.

You will be periodically inspected by NRC. A fee may be charged for inspections in accordance with 10 CFR Part 170. Failure to conduct your program safely and in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in prompt and vigorous enforcement action against you. This could include issuance of a notice of violation, or in case of serious violations, an imposition of a civil penalty or an order suspending, modifying or revoking your license as specified in the General Policy and Procedures for NRC Enforcement Actions, 10 CFR Part 2, Appendix C.

Re: License Additions
License No. 37-20584-01
Docket No. 030-19945

Geotechnical
Engineering

Dear Mr. White:

This letter is in regard to the above referenced materials license and our request for additions to be made to that license. Attached to this letter is a copy of our recently renewed license dated September 14, 1987. Since that time, our firm has decided to deal with a new firm which will supply our nuclear moisture density gauges. A summary of the additions that we request be made to our license is provided below for your review.

Research and
Special Studies

Construction
Quality Control

Laboratory
Testing

Transportation
and Traffic
Engineering

Environmental
Engineering

NDT and
Related Services

Item Number

- 6. C. Cesium 137
- D. Americium 241-Be
- E. Americium 241
- 7. C. Sealed Source (CPN Drawing CPN-131)
- D. Sealed Source (CPN Drawing CPN-131)
- E. Sealed Source (CPN Drawing CPN-131)
- 8. C. No single source to exceed 10 millicuries per source.
- D. No single source to exceed 50 millicuries per source.
- E. No single source to exceed 100 millicuries per source.
- 9. C. and D. For use in CPN Corporation MC Series surface moisture density gauges to measure properties of materials.
- E. For use in CPN Corporation ACZ Series asphalt content gauge for measuring properties of asphalt samples.
