1. The purpose of this document is to provide a comprehensive overview of the current status of the project and to identify the key areas that require attention. The information presented here is based on the most recent data available and is intended to serve as a guide for decision-making.

2. The project has made significant progress since the last report, with several key milestones being achieved. However, there are still a number of challenges that need to be addressed in order to ensure the successful completion of the project.

3. The following table provides a summary of the project's performance over the last quarter, highlighting the areas of strength and the areas that need improvement.

4. The information presented in this document is confidential and should be handled accordingly. It is intended for the use of management and other authorized personnel only.

Category	Sub-Category	Value	Unit	Notes

Docket No. 50-387

Dear Mr. Butler:

This letter is to inform you that in accordance with License Condition 2.C.(16) to Facility Operating License No. NPF-14, Pennsylvania Power & Light Company has implemented design modifications on the wetwell/drywell vacuum breaker valves that included installation of new disc assemblies, installation of new shaft bearing caps and replacement of the shaft, keys and turnbuckle with stronger materials.

The completion of these modifications closes this license condition. If you have any questions, please contact us.

Very truly yours,

N. W. Curtis
Vice President-Engineering & Construction-Nuclear
