PROPOSED AMENDMENTS 68 TO NPF-14

Docket Nos. 50-387
50-388

Dear Mr. Butler:

The purpose of this proposed amendment is to request a change to both the Susquehanna SES Unit 1 and Unit 2 Technical Specifications.

Background

NUREG 0737 Item III.D.1.1 required the establishment of the leakage reduction program outlined in Specification 6.8.4a. The system listing in that specification falls short of PP&L's actual commitment to the NRC as provided in FSAR Section 18.1.69, attached. In order to avoid confusion, Specification 6.8.4a is proposed to be upgraded to reflect the NRC commitment.

Description of Change

See the attached marked-up pages. The change adds the Residual Heat Removal and Post Accident Sampling Systems to the listing of "Primary Coolant Sources Outside Containment" in Specification 6.8.4a.

No Significant Hazards Considerations

The proposed change does not:

- (1) involve a significant increase in the probability or consequences of an accident previously evaluated,
- (2) create the possibility of a new or different kind of accident from any accident previously evaluated, or
- (3) involve a significant reduction in a margin of safety.
