Dear Mr. Keiser:

SUBJECT: HIGH RANGE RADIATION MONITORS (TAC NOS. 69117/69118)

RE: SUSQUEHANNA STEAM ELECTRIC STATION, UNITS 1 AND 2

By a letter dated June 28, 1988, you requested an "exemption from the requirements of Regulatory Guide 1.97," with respect to the High Range Radiation Monitors' system accuracy. Please be advised that the provisions of regulatory guides do not constitute staff or Commission requirements and, therefore, exemptions for any non-compliance are not appropriate.

Since you are proposing a revision to one of your commitments which formed a basis for the staff's safety evaluation for Susquehanna, the change in your commitment should be analysed under the purview of the Commission's regulation at 10 CFR 50.59 to determine if the proposed change to your commitment constitutes an unreviewed safety issue. The analysis provided in your June 28, 1988 letter does not appear to indicate that there is an unreviewed safety issue involved. If upon reexamination you find that the change in commitment does constitute an unreviewed safety issue, please write to us again and provide us your analysis which leads to such a determination. The staff will then perform an evaluation of the concerns raised and issue a safety evaluation.

If you have any questions regarding the above recommendations, please do not hesitate to contact us.

Sincerely,

Mohan C. Thadani
