SUSQUEHANNA STEAM ELECTRIC  
TMI ACTION ITEMS STATUS  
PLA-3185 FILES R41-1/R41-2

Dear Dr. Murley:

This letter responds to your request of April 14, 1989, for the completion status of TMI action items at the Susquehanna Steam Electric Station.

A review of our tracking records shows that all initial actions have been completed for both units and that the only follow-up issues remaining involve final installation of LED's in place of control room panel lights for SSES Unit 1 and common panels. This action stems from resolution of issues resulting from the Detailed Control Room Design Review. Installation of LED's is complete for SSES Unit 2. Installation for Unit 1 and common panels is scheduled for the Unit 1 fourth refueling outage which is currently in progress with restart scheduled for June, 1989.

A complete review of the attachment to your letter, including certification of dates of completion, will require 30 to 60 days. However, we are confident that the above status accurately reflects PP&L's implementation status for TMI action items.

Very truly yours,

H. W. Keiser
