Docket Nos. 50-387
and 50-388

Dear Dr. Butler:

This letter is in response to a request for additional information from your staff. The differential temperature sensors will not be disabled during the time period of this Technical Specification. These sensors will also meet their Technical Specification surveillance requirements.

The intent of the emergency Technical Specification change is to provide relief from the operability requirements since the differential temperature sensor will not perform their function under all circumstances as discussed in our letter (PLA-3279, dated October 19, 1989).

Also as discussed the changes to the Alarm Response Procedures will be made by October 25, 1989.

If you have any additional questions, please contact us.

Very truly yours,

H. W. Keiser
