REVISED RESPONSE TO BULLETIN 88-10  
PLA-3286 FILE R41-2, R41-1A

Docket Nos. 50-387  
50-388

Dear Dr. Butler:

In PP&L's response to NRC Bulletin 88-10 (PLA-3152 dated March 31, 1989), we indicated that five breakers would be replaced or tested prior to startup following the Susquehanna SES Unit 2 refueling outage which is currently in progress. Three of these breakers were installed in Unit 2 and have been replaced. The remaining two breakers are installed in a battery charger for the "E" Diesel Generator. Due to procurement delays, replacements for these breakers may not be available until January, 1990. PP&L is attempting to expedite delivery and will replace the breakers as soon as practicable. Continued operation has been justified. If you have any questions, please contact Mr. R. M. Harris at (215)770-7918.

Very truly yours,

H. W. Keiser
