SUSQUEHANNA STEAM ELECTRIC STATION
RESPONSE TO GENERIC LETTER 89-15,
EMERGENCY RESPONSE DATA SYSTEM
PLA-3375 FILE R41-1D, R41-2

Docket No. 50-387
and 50-388

Dear Dr. Butler:

This letter responds to Generic Letter 89-15, Emergency Response Data System (ERDS).

PP&L recognizes the Commission's role in the event of an emergency at a nuclear power plant and the need for an accurate and timely flow of data regarding plant parameters. It is clear that electronic transmission of data is advantageous with respect to facilitating both accuracy and timeliness. Therefore, we are supportive of the ERDS concept as it is described in the generic letter: 1. There is a prescribed parameter set defined by enclosures to the generic letter, 2. The data will be provided from existing facility electronic data systems, 3. ERDS will only be used during emergencies and would be activated by us upon declaration of an Alert or higher emergency classification and 4. Where electronic data transmission capability for designated parameters does not exist, voice transmission over the existing Emergency Notification System would be acceptable and no modification to existing systems would be required.

Based on the program as defined by Generic Letter 89-15 and its attachments, PP&L will voluntarily participate in the implementation of ERDS. Should the program be altered, PP&L will reevaluate participation in the program. We are currently evaluating an acceptable implementation date. Mr. W.W. Williams has been designated as the company's contact person on this program. He can be reached at (215) 770-7910.

Very truly yours,

H. W. Keiser
