SUSQUEHANNA STEAM ELECTRIC STATION
UPDATE TO 10CFR50.9 REPORT
PLA-3337 FILES R41-2/A17-10

Docket Nos. 50-387
and 50-388

Dear Mr. Martin:

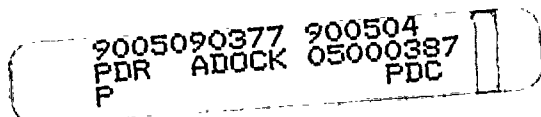

The purpose of this letter is to provide the status of PP&L's actions regarding reactor building temperature concerns reported pursuant to 10CFR50.9 on January 17, 1989 (PLA-3132). At that time, PP&L committed to update several EQ binders and to relocate some equipment to a mild environment.

The EQ binder updates have been completed. In addition, equipment associated with modifications planned under our Appendix R project have been relocated, replaced, or deleted. Two Bailey cards per unit remain to be relocated. They will be relocated prior to startup following the fifth refueling outage on Unit 1 currently scheduled to begin on September 8, 1990 and the fourth refueling outage on Unit 2 currently scheduled to begin on March 9, 1991. Continued operation until those outages have been justified.

Very truly yours,

H. W. Keiser
