

DEC 19 1990

Docket Nos.: 50-387
50-388

Pennsylvania Power & Light Company
ATTN: Mr. Harold W. Keiser
Senior Vice President - Nuclear
2 North Ninth Street
Allentown, Pennsylvania 18101

Gentlemen:

Subject: Inspection 50-387/90-80 and 50-388/90-80

This refers to your letters dated August 3, 1990, and November 19, 1990, in response to our letter dated June 8, 1990 and telephone conversation on September 29, 1990, regarding Susquehanna Steam Electric Station (SSES) Emergency Operating Procedures (EOPs).

Thank you for providing a response to our requests. Your responses prioritized the EOP issues into three categories. We understand that all priority 1 and 2 issues will be completed by June 30, 1991. All remaining issues will be addressed when the EOPs are upgraded to the Revision 4 of the BWR Owner's Group (BWROG) Emergency Procedure Guidelines (EPG) by January 30, 1993. Based on your schedule, SSES will be the last BWR in the Region to implement Revision 4 of the BWROG EPGs. We understand that the reasons for the January 31, 1993 date are that your resources are being utilized first on the SSES Individual Plant Evaluation (IPE) and your desire to only make one major change to the EOPs to implement Revision 4 of the BWROG EPGs and also implement the results of the IPE. We would not find your actions acceptable if you delay upgrading the SSES EOPs to implement revision 4 of the BWROG EPGs beyond the January 31, 1993 date. Your actions will be examined during a future inspection of your licensed program.

Your cooperation with us is appreciated.

Sincerely,

Original Signed By:

Lee H. Bettenhausen, Chief
Operations Branch
Division of Reactor Safety
