SUSQUEHANNA STEAM ELECTRIC STATION
FEBRUARY 22, 1991 PP&L/NRC MEETING
PLA-3540 FILE R41-2

Docket Nos. 50-387
and 50-388

Dear Forrest:

Thank you for taking time out of your busy schedule to discuss pertinent regulatory issues with Harry Keiser, Bob Byram, and me. I found our discussions quite enlightening and look forward to further opportunities of this kind in the future.

I would like to take this opportunity to reiterate a few of the thoughts we left with you.

Maintenance - PP&L is committed to a strong maintenance program; we believe this commitment coupled with commensurate implementation should mitigate the need for prescriptive rulemaking.

Training - PP&L believes that training, qualification and professionalism of industry personnel have been significantly enhanced due to the NRC endorsed efforts of the National Academy for Nuclear Training. We support efforts to examine the need to expand the scope of the Academy's accreditation program in order to provide these enhancements in other areas.

Public Perception of Nuclear Power - PP&L is committed to improve our publics' perception of nuclear power. One key element in this effort is to enhance their understanding of the role of the NRC. We are trying to obtain some useful material from Region I in support of this objective.

Along the same line, we would like to commend the NRC for their recent decision to hold our SALP review meetings at Susquehanna. They provide a valuable opportunity for our employees and our public to both witness and interact in the regulatory assessment process.

Thank you again for meeting with us.

Sincerely,

J. T. Kauffman
