SUSQUEHANNA STEAM ELECTRIC STATION
FINAL RESPONSE TO GENERIC LETTERS 88-14
PLA-3588 **FILE R41-2**

Docket Nos. 50-387
and 50-388

References: PLA-3385, R. G. Byram to USNRC, "Supplemental Response to Generic Letter 88-14," dated November 30, 1990.

PLA-3153, H. W. Keiser to USNRC, "Response to Generic Letter 88-14," dated February 24, 1989.

Dear Dr. Butler:

In final response to Generic Letter 88-14, the following information provides the status of Pennsylvania Power & Light Company's efforts as previously summarized in the referenced PLA-3385 for meeting the general requirements of the Generic Letter.

Status of Instrument Air System Modifications

Modifications to install constant dewpoint monitoring, replace dryer pre- and afterfilters with higher efficiency filters and install local high efficiency filters at critical components are complete for both Units 1 and 2.

Status of Testing

As previously reported, air operated dampers HD27538A,B and HD17538A,B could not be tested without jeopardizing the availability of both Units. Our engineering department has completed design changes that lock these dampers in the desired position. These design changes also removed the air supply to the dampers. Therefore, these dampers no longer fall within the scope of the Generic Letter.

Handwritten marks or characters in the top right corner.

Faint, illegible text or markings in the upper middle section.

Faint, illegible text or markings in the middle right section.

Faint, illegible text or markings in the bottom right corner.

Finally, MSIV accumulator check valves have been tested on both Units 1 and 2.

This completes our response to Generic Letter 88-14. If you have any questions, please contact Mr. J. B. Wesner at (215) 774-7911.

Very truly yours,

H. W. Keiser
Sr. Vice President-Nuclear
