SUSQUEHANNA STEAM ELECTRIC STATION
REMOVAL OF TRAINING CENTER SAND MOUNDS
CCN 741326 FILE R9-8A
PLE- 14811

Dear Mr. Lehman:

Pennsylvania Power and Light Co. (PP&L) is planning on removing the Susquehanna Steam Electric Station (SES) Training Center sand mounds and expanding the existing parking lot. As I mentioned in our October 16, 1991 telephone conversation, there are two sand mounds which have not been used since 1988 when the Training Center was tied into the Station's existing Sewage Treatment Plant.

It is estimated that the sand mounds contain 700 cubic yards of soil, 230 cubic yards of stone, and 465 cubic yards of sand. Plans are to:

- 1) Reuse the cap soil in the vicinity of Training Center
- 2) Use the stones as fill for the parking lot expansion
- 3) Take the sand to an approved Pennsylvania Department of Environmental Resources (PaDER) sanitary landfill for disposal. Also, there will be a few roll-offs of distribution piping which will be taken to this landfill.

This proposed project has also been reviewed with Mr. John Jenkins, Sewage Enforcement Officer, Salem Township, in recent telephone conversations. He has indicated that he saw no problem with this removal option as long as the PaDER concurred.

This proposed project will be presented to PP&L management for funding during the week of October 21, 1991. If approved, it is expected that this activity will be initiated as on or about November 4, 1991.
