Hi Celimar

I was able to find our documentation for all units that were disposed of at New Albany. I also reached out to the contracted agency that removed our devices and am reviewing provided manifests and inventory.

If ok, I'll be able to produce a formal letter for you by next week. Just a couple of days later than I anticipated, but it is a lot of details to go over, hope that's ok.

Thanks and have a great weekend!

Neida

Good Morning Neida,

I looked through our database for the documents related to the termination of your specific license in 2016. The records that General Mills sent us regarding transfer of devices to RAM Services, Inc. in November of 2015 did not include information on the generally licensed devices listed below.

Hi Neida,

The attached document refers to the termination of your specific license. My email was regarding the general license you had for devices at the New Albany location of use. These devices would not have been under your specific license.

Please let me know if you have any other questions.

Thank you,

Celimar Valentin-Rodriguez, Ph.D.

EXTERNAL EMAIL:

Good Morning Ms. Brown,

Our Fees Office forwarded me your request for termination of your general license. I tried calling you this morning and left you a voicemail.

In your email below, you have indicated that General Mills is no longer the owner of the building at 707 Pillsbury Lane, New Albany, IN 47150. Our database indicates that General Mills has 21 generally licensed devices at this location, as documented in the attached General Registration Form.

Our regulations in 10 CFR 31.5(c)(9)(i) state that a general licensee can only transfer generally licensed devices to another general licensee if the devices remains in use at a particular location. Our regulations also require that the transferor, in this case General Mills, give the transferee a copy of 10 CFR 31.5, 31.2, 30.51, 20.2201, and 20.2202, and any safety documents identified in the label of the devices to be transferred. Furthermore, you should have sent the NRC a report **within 30 days** of this transfer, with the following information for all transferred devices.

1. Device manufacturer or initial transferor's name;
2. Model number and serial number of the device;

3. Transferee's name and mailing address for the location of use; and
4. Name, title, and phone number of the responsible individual identified by the transferee to have knowledge and authority to take actions to ensure compliance with the appropriate regulations and requirements.

You may provide this information by email to me, in an official company letter, dated and signed. You may also send the transfer report to the following address.

Director, Office of Nuclear Material Safety and Safeguards
ATTN: Document Control Desk/GLTS
U.S. Nuclear Regulatory Commission
Washington, DC 20555-001

Once we have received the transfer report and we have verified the successful transfer of the devices, we can terminate your general license.

Please do not hesitate to contact me with any questions or concerns.

Thank you,

Celimar Valentin-Rodriguez, Ph.D.
