17.1 QUALITY ASSURANCE DURING DESIGN AND CONSTRUCTION

This section is not applicable to the FSAR.

Quality Assurance requirements during design and construction are defined in Section 16 of the HCGS PSAR.

Section 16 of the HCGS PSAR was updated on June 6, 1983, and transmitted to the Office of Inspection and Enforcement, Region I, King of Prussia, Pennsylvania, as required by the amendments to 10CFR50.54 and 10CFR50.55 as published in 48FR, No. 6 on January 10, 1983.

On August 11, 1983, Pages 16.1-3 and 16.2-9 were replaced to include two minor changes which provided clarification to the PSAR update of June 6, 1983. These pages have been transmitted to the Office of Inspection and Enforcement, Region I, King of Prussia, Pennsylvania.

On October 30, 1984 a general update to Sections 16.1, 16.2 and 16.4 were transmitted to the Office of Inspection and Enforcement, Region I, King of Prussia, Pennsylvania as required by 10CFR 50.54.

On November 6, 1985 a general update of Section 16 to reflect Bechtel Corporation organization changes was transmitted to the Office of Inspection and Enforcement, Region I, King of Prussia, Pennsylvania as required by 10CFR50.55.

17.2 QUALITY ASSURANCE DURING THE OPERATIONS PHASE

The licensee is responsible for the operation and maintenance of Salem/Hope Creel Generating Stations. These activities are presently conducted in accordance with the NRC approved Quality Assurance Topical Report (QATR) which describes the formal and comprehensive control methods established to assure compliance with 10CFR50, Appendix B.

The QATR describes how the Quality Assurance Program is to be functionally implemented with due regard to the safety and health of the public and the personnel on site. The Salem/Hope Creek Quality Assurance Program as described by the QATR is incorporated herein by reference.

17.3 QUALITY ASSURANCE OF THE INDEPENDENT SPENT FUEL STORAGE INSTALLATION

The licensee is responsible for the operation and maintenance of Salem/Hope Creel Generating Stations. These activities are presently conducted in accordance with the NRC approved Quality Assurance Topical Report (QATR) which describes the formal and comprehensive control methods established to assure compliance with 10CFR50, Appendix B. By letter dated May 12, 2003, PSEG Nuclear notified the NRC of its intent to apply its previously approved QA Program to the construction and operations of an ISFSI at the Hope Creek and Salem Generating Stations in accordance with 10CFR72.140(d).

The QATR describes how the Quality Assurance Program as applied to the Independent Spent Fuel Storage Installation is to be functionally implemented. The Salem/Hope Creek Quality Assurance Program as described by the QATR is incorporated herein by reference.
