SUBJECT: SUMMARY OF PUBLIC SCOPING MEETING RELATED TO THE
EARLY SITE PERMIT APPLICATION REVIEW OF THE CLINCH RIVER
NUCLEAR SITE

The U.S. Nuclear Regulatory Commission (NRC) staff conducted two environmental scoping meetings related to the review of the Clinch River Nuclear Site (CRN) early site permit (ESP) application submitted by Tennessee Valley Authority (TVA). The public meetings were conducted on Monday, May 15, 2017, at the Pollard Technology Conference Center, 210 Badger Avenue, Oak Ridge, Tennessee. The purpose of the meeting was to provide the public with an opportunity to participate in the environmental scoping process by providing comments on any issues the public thought the NRC staff should consider while preparing an environmental impact statement for the CRN Site ESP application.

During both public meetings, the NRC staff presentation outlined the overall licensing process under Title 10 of the Code of Federal Regulations (10 CFR) Part 52; provided a description of the National Environmental Policy Act of 1969 review process; discussed the environmental requirements outlined in the 10 CFR Part 51; and addressed how these requirements would be implemented during the CRN Site ESP review. After each presentation, members of the public were invited to provide comments. Approximately 70 people attended the afternoon meeting, and approximately 43 attended the evening meeting. The participants included members of the NRC staff, members of the U.S. Corps of Engineers (USACE) staff, representatives from TVA, members of the public, and representatives from the news media, and local government officials. Public comments and questions were mainly focused on small modular reactors, emergency planning zone, the ESP process, economics, and water consumption.

CONTACTS: Patricia Vokoun, NRO/DNRL
