I am opposed to this expensive nuclear experiment. We cannot dispose of the nuclear waste we have accumulated. Why do we persist in creating more? We need to put our expertise on wind and solar, something we don't have to be concerned about polluting water, air and soil with devastating health effects. These sources of power are on the rise world wide and are much safer. They have provided many, safer jobs. Tennessee does not need to lag behind and put us in nuclear jeopardy.

Sincerely,
Beverly Sweeton
