**SUSQUEHANNA STEAM ELECTRIC STATION
REVISION TO PROPOSED AMENDMENTS 148
AND 102 : ILRT SCHEDULE
PLA-3781 FILES A17-2/R41-2**

Docket Nos. 50-387
and 50-388

Reference: PLA-3633, H.W. Keiser to C.L. Miller, "Proposed Amendment No. 148 to License No. NPF-14 and Proposed Amendment No. 102 to License No. NPF-22", dated August 16, 1991.

Dear Mr. Miller:

Section 4.6.1.2a of the referenced submittal outlines schedular requirements for 10CFR50 Appendix J Type A tests. In the referenced submittal, PP&L proposed a change ("Insert A") to allow a revised schedule for these tests.

Based on discussions with Mr. Jim Raleigh and Mr. Calvin Moon of NRR on May 26, 1992, PP&L hereby proposes to withdraw this portion of our proposed change and replace it with the change to 4.6.1.2a reflected on the attached marked-up pages. The rest of our request remains intact, and is also reflected on the marked-up pages for clarity.

The above change does not require a change to our previous No Significant Hazards evaluation. Any questions should be directed to Mr. R. Sgarro at (215) 774-7914.

Very truly yours,

for H.W. Keiser

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that this is essential for ensuring the integrity of the financial statements and for providing a clear audit trail. The text notes that any discrepancies or errors in the records can lead to significant complications during an audit and may result in the disallowance of certain expenses.

2. The second part of the document addresses the issue of proper documentation. It states that all receipts and invoices must be properly filed and indexed to facilitate the search and retrieval of information. The document also highlights the need for regular reviews of the records to ensure that they are up-to-date and complete. It suggests that a systematic approach to record-keeping can help to minimize the risk of errors and omissions.
