Docket Nos. 50-387  
and 50-388

Dear Mr. Martin:

During the conduct of the NRC Maintenance Team Inspection (Inspection Report Nos. 50-387/90-81 and 50-388/90-81), a question (NRC Item No. 46, PP&L Item No. 74) regarding risk based component ranking and the maintenance process was raised. In response to that question, PP&L indicated its intention to develop a risk-based component level prioritization system to augment the TEAM manual for dealing with improving preventive maintenance and the work authorization system. The schedule conveyed at that time was to have Preventive Maintenance Improvement Program (PMIP) packages developed for all Susquehanna Priority 1 and 2 components by July 1, 1992 and have the risk-based component level prioritization system implemented by the end of 1992. As a result of the promulgation of the Maintenance Rule, PP&L has decided to integrate our work with respect to risk-based component level prioritization into our overall response to the requirements of the rule. Therefore, this work will be completed on a timetable consistent with our planned schedule for compliance with the Maintenance Rule, which is currently under development.

Should you have any questions, please call Mr. W. Williams at 215-774-5610.

Very truly yours,

H. W. Keiser
