**SUSQUEHANNA STEAM ELECTRIC STATION
REQUEST FOR EXTENSION IN 10CFR50 APP. H
REPORTING REQUIREMENTS FOR UNIT 1
PLA-3940 FILE R41-2**

Docket Nos. 50-387

Dear Mr. Miller:

This letter serves to forward our request to extend submittal of the Susquehanna Steam Electric Station Unit 1 reactor vessel material surveillance test report as required by 10CFR50 Appendix H from March 31, 1993 to May 28, 1993.

The Unit 1 surveillance capsule containing the material specimens for testing was removed from the Unit 1 reactor pressure vessel in March 1993 and sent to General Electric (G.E.) for testing. A G.E. draft report of the test findings has been received by PP&L.

PP&L is reviewing the G.E. draft report and will finalize it working with G.E. We anticipate this to take an additional 6 to 8 weeks beyond our original planned reporting date of March 31, 1993. Therefore, we request an extension of the date of submittal for this report to May 28, 1993.

Please call Mr. J.B. Wesner at (215) 774-7911 if you have any questions.

Very truly yours,

H. W. Keiser 300050
