Docket Nos. 50-387  
50-388

Mr. R. G. Byram  
Senior Vice President - Nuclear  
Pennsylvania Power & Light Company  
2 North Ninth Street  
Allentown, Pennsylvania 18101

Dear Mr. Byram:

SUBJECT: NRC REGION I COMBINED INSPECTION REPORT NOS. 50-387/93-04  
AND 50-388/93-04

The enclosed report documents a resident safety inspection conducted by Messrs. G. S. Barber and D. J. Mannai, and others from February 16, 1993 through March 29, 1993, at the Susquehanna Steam Electric Station (SSES), Salem Township, Pennsylvania. The inspection covered plant operations, surveillance, and maintenance for both units. At the conclusion of the inspection, Mr. G. S. Barber, Senior Resident Inspector, summarized the inspection findings with Mr. H. G. Stanley and other members of your staff.

Within the scope of this inspection, our inspectors found that the Susquehanna Steam Electric Station was safely operated and maintained. The inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress. The purpose of the inspection was to determine whether NRC licensed activities were being conducted safely and in accordance with regulatory requirements. Based on the results of this inspection, it appears that your staff conducted licensed activities in a safe manner during this period.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room.
