**SUSQUEHANNA STEAM ELECTRIC STATION
REVISION TO PROPOSED AMENDMENT 107
TO LICENSE NO. NPF-22:
CHANGES TO HPCI PUMP SUCTION TRANSFER LOGIC
PLA-3955**

FILES A17-2/R41-2

Docket No. 50-388

Reference: PLA-3838, H. W. Keiser to USNRC, "Proposed Amendment 107 to License No. NPF-22: Changes to HPCI Pump Suction Transfer Logic," dated August 19, 1992.

Dear Mr. Miller:

The purpose of this letter is to transmit administrative changes to the above referenced proposed amendment made as a result of the similar changes being proposed for Unit 1 and the desire for maintaining consistency. These changes are strictly administrative in nature, and are completely bounded by the originally submitted Safety Analysis and No Significant Hazards Consideration.

It is requested that this proposed amendment be approved prior to the start of the Unit 2 sixth refueling and inspection outage (currently scheduled to begin on March 12, 1994), and conditioned to become effective prior to restart following the outage. Startup is currently schedule for May 5, 1994; we will keep you informed of any schedule changes.

Questions regarding this revised proposal should be directed to Mr. A. K. Maron at (215) 774-7852.

Very truly yours,

R. G. Byram
