

50-387/388

October 5, 1993

The Honorable Richard H. Lehman
Chairman, House Natural Resources Committee,
Subcommittee on Energy and Mineral Resources
818 O'Neill Building
300 New Jersey Avenue, S.E.
Washington, DC 20515

Dear Congressman Lehman:

By letter dated September 18, 1993, the undersigned informed you of a presentation being made to the Nuclear Regulatory Commission on October 1, 1993 on serious design deficiencies at the Susquehanna Steam Electric Station in Pennsylvania. We recognize the many demands on your time and understand why you were unable to attend this meeting. We are respectfully enclosing a copy of the handout which was distributed at this presentation so as to keep your committee informed on these concerns, which potentially affect at least one third of the nuclear power plants in the United States.

We appreciate very much your attention in this matter, and please do not hesitate to contact us for additional information on these concerns or their current status.

Yours very truly,

David A. Lochbaum
