PROPOSED AMENDMENT NO. 184 TO
LICENSE NO. NPF-14 AND NO. 140 TO
LICENSE NO. NPF-22 : MODIFY THE REACTOR COOLANT
pH ANALYSIS REQUIREMENT
PLA-4297 FILES A17-2/R41-2

Docket Nos. 50-387
and 50-388

Dear Sir:

The purpose of this letter is to propose changes to the Susquehanna SES Units 1 and 2, Technical Specifications. The proposed change modifies the surveillance requirement for reactor coolant system pH analysis in Section 4.4.4 of the Technical Specifications and clarifies that the pH analysis is to be taken at least every 72 hours whenever reactor coolant conductivity exceeds 1.0 $\mu\text{mho/cm}$.

The attached assessment provides the safety basis for this proposed change and concludes that the change involves no significant hazards. The change has been reviewed by the Plant Operations Review Committee (PORC) and the Susquehanna Review Committee (SRC).

PP&L would like to incorporate this enhancement into the SSES Technical Specifications upon its approval, and asks that the NRC complete its review no later than December 31, 1995. Any questions on this submittal should be directed to Mr. A. K. Maron at (610) 774-7852.

Very truly yours,

R. G. Byram
