REPORT NEDE-24011-P-A-10 TO SECTION 6.9.3.2
PLA-4293 FILES A17-2/R41-2

Docket No. 50-388

Dear Sir:

The purpose of this letter is to propose a change to the Susquehanna SES Unit 2 Technical Specifications. This proposed change incorporates the General Electric (GE), NRC approved methodology for GE-12 type Lead Use Assemblies (NEDE-24011-P-A-10) into the list of references of Section 6.9.3.2.

PP&L is planning to insert four GE Lead Use Assemblies (LUAs) in the Susquehanna Unit 2 Cycle 8 core during the fall of 1995. Adding this reference to the Technical Specifications will allow the use of the GE methodology to document that all applicable requirements of the safety analysis are met by the four GE-12 LUAs.

The attached assessment provides the safety basis for this proposed change and concludes that the change involves no significant hazards. This change has been reviewed by the Plant Operations Review Committee (PORC) and the Susquehanna Review Committee (SRC).

As stated above, this proposed change is planned to be incorporated into the reload design for the upcoming Unit 2 Refueling and Inspection Outage. As a result, we ask that the NRC complete its review no later than August 9, 1995.

Any questions on this submittal should be directed to Mr. A. K. Maron at (610) 774-7852.

Very truly yours,

R. G. Byram
