RECOGNITION OF MR. C. POSLUSNY
PLA-4304**

FILE R41-2

Docket Nos. 50-387
and 50-388

Pennsylvania Power & Light Company would like to recognize the considerable efforts provided by Mr. C. Poslusny, Sr. Project Manager, for his management of the numerous license amendments needed to support the ongoing Susquehanna SES Unit 1 8th Refueling & Inspection Outage. Key amendments included:

- o Unit 1 Power Uprate
- o A change to the Core Alteration Definition
- o A change in preconditions for hydrostatic testing
- o A change in Scram Discharge Volume testing requirements
- o A change in APRM operability requirements
- o A change in Standby Liquid Control operability requirements

Mr. Poslusny's direct involvement in these amendments contributed to their timely review and approval - allowing PP&L to complete our outage preplanning activities.

Several of the requested changes were Cost Beneficial Licensing Actions, an effort PP&L will continue to strongly endorse. We sincerely appreciate the priority that the NRC has placed on these issues as we strive to achieve higher standards for safe, economical power generation.

Very truly yours,

R. G. Byram
