*Reference: Letter (PLA-4257), R.G. Byram to U.S. Nuclear Regulatory Commission, "Proposed Amendment No. 180 to License NPF-14 And Proposed Amendment No. 134 to License NPF-22 : Radiation Monitor Operability Requirements", dated February 1, 1995.*

The purpose of this letter is modify the wording of a proposed change to Susquehanna SES Technical Specification 3/4.3.2 for Units 1 and 2. Pennsylvania Power & Light submitted proposed amendments on February 1, 1995 to change the operability statement associated with Secondary Containment Isolation Radiation Monitors. The NRC, in reviewing the proposed change, requested a clarification of the operability statement wording for the Refueling Floor Exhaust Duct High Radiation & Wall Exhaust Duct Radiation Monitors. PP&L representatives and NRC staff discussed the operability statement, and agreed upon revised wording that clarified the proposed amendments.

The revised notation (#) in tables 3.3.2-1 and 4.3.2.1-1 regarding required Refueling Floor Exhaust Duct High Radiation & Wall Exhaust Duct Radiation Monitor operability is:

“When handling irradiated fuel in the secondary containment and during CORE ALTERATIONS and operations with a potential for draining the reactor vessel. Single Control Rod movement, except for the purpose of SDM demonstration (TS 3.10.3), is excluded.”

Pennsylvania Power & Light has reviewed the safety analysis and No Significant Hazards Considerations associated with the proposed amendments in light of the wording change. We find that the clarification to the wording does not impact the intent of the proposed amendments, and that the analysis performed in support of the original amendments remains valid for the wording change. As a result, the analysis supplied with the original submittal, PLA-4257, should

continue to be used. Copies of the affected Technical Specifications, showing the wording change, are attached to this letter.

We are committed to making the proposed Technical Specification change as a Cost Beneficial Licensing Action in support of our fall refueling outage. I would like to thank you for the work that has already been done in reviewing the proposed amendments to support our upcoming outage. Any questions regarding this request should be directed to Mr. Terence Bannon at (610) 774-4019.

Very truly yours,

R. G. Byram
