PROPOSED AMENDMENT NO. 145 TO LICENSE NPF-22:
ACCIDENT MONITORING INSTRUMENTATION
PLA-4346**

FILES R41-1/A17-2

Docket No. 50-388/NPF-22

The purpose of this letter is to propose changes to Susquehanna SES Technical Specification Table 3.3.7.5-1, ACCIDENT MONITORING INSTRUMENTATION, for Unit 2. Currently, the referenced table contains channel operability values for Neutron Flux which were established as the result of an exigent amendment for Unit 2. The conditions which prompted the exigent amendment have been resolved, and therefore the proposed change reestablishes the original channel operability values in the table.

The attached analysis discusses the safety basis for the proposed Technical Specification change and concludes that the change involves no significant hazards. The change has been reviewed by the Plant Operations Review Committee (PORC) and the Susquehanna Review Committee (SRC).

Any questions regarding this request should be directed to Mr. Terence Bannon at (610) 774-4019.

Very truly yours,

R. G. Byram
