PROPOSED AMENDMENT NO. 189 TO LICENSE NPF-14 AND
PROPOSED AMENDMENT NO. 146 TO LICENSE NPF-22:
REVISED TRANSMITTAL LETTER FOR REMOVAL OF
FIRE PROTECTION REQUIREMENTS
FROM TECHNICAL SPECIFICATIONS
PLA-4367**

FILES R41-2/A17-2

Docket Nos. 50-387/NPF-14
and 50-388/NPF-22

This letter supersedes PLA-4352 dated August 11, 1995. The purpose of this letter is to respond to a NRC request to resubmit our proposal to change Technical Specifications for Susquehanna Steam Electric Station (SSES), Units 1 and 2, to implement the provisions of Generic Letter 86-10 related to the relocation of the plant's Fire Protection Program from the technical specifications to another controlled document (Technical Requirements Manual). This proposal follows the guidance of Generic Letter 88-12.

An assessment is attached which discusses the safety basis for this proposed change and concludes that the change involves no significant hazards. The change has been reviewed by the Plant Operations Review Committee and the Susquehanna Review Committee. The proposed change meets the Cost Beneficial Licensing Action criteria as outlined in NRC Administrative Letter 95-02. The NRC previously approved a proposed change of similar nature in a SER dated February 1, 1995 for Connecticut Yankee Atomic Power Company's Haddam Neck Station.

Attachment 1 presents the marked-up copy of the affected Technical Specifications.

We request issuance of the proposed amendments at your earliest convenience with the amendments effective as of the date of issuance, to be implemented within 60 days of issuance.

If you should have any questions on the above, please contact Mr. W. W. Williams at (610) 774-7742.

Very truly yours,

R. G. Byram
