- Reference:
- 1) PLA-4113, dated April 5, 1994; SRC AUDIT FREQUENCY REQUIREMENTS.
 - 2) PLA-4381, dated October, 20, 1995; REVISION TO SRC AUDIT FREQUENCY REQUIREMENTS.

The purpose of this letter is to withdraw Pennsylvania Power & Light (PP&L) Company's pending request for a license amendment associated with SRC audit frequency requirements for fire protection audits. The NRC previously approved an amendment request for PP&L which relocated most of the SRC Audit Frequency requirements from the Technical Specifications to the FSAR, but deferred approving the relocation of fire protection requirements. PP&L plans to implement the requested relocation of fire protection requirements via our upcoming Improved Technical Specification submittal. As a result, PP&L no longer requires a separate submittal concerning the relocation of these requirements.

Any questions regarding this request should be directed to Mr. Terence Bannon at (610) 774-4019.

Very truly yours,

R.G. Byram
