LICENSEE EVENT REPORT 50-387/97-020-00  
PLA - 4783 FILE R41-2

Docket No. 50-387  
License No. NPF-14

Attached is Licensee Event Report 50-387/97-020-00. This report is being made pursuant to 10CFR50.73(a)(2)(i)(B), in that Susquehanna Unit 1 was in a condition prohibited by the Technical Specifications when Unit 1 was allowed to continue to operate in Condition 1 beyond the specified time limits of the appropriate Limiting Condition of Operation ACTION statement, for an inoperable Main Steam Relief Valve (MSRV) acoustic monitor. Technical Specifications 3.3.7.5 and 3.4.2 require all MSRV acoustic monitors to be operable in Conditions 1 and 2. Enforcement Discretion was requested from the Nuclear Regulatory Commission and was granted, allowing continued operation until an outage of sufficient length to affect repair, not to exceed the Unit 1 10th Refuel Outage. A subsequent amendment to the applicable Unit 1 Technical Specifications was approved by the NRC.
