Docket No. 50-388
License No. NPF-22

Attached is Licensee Event Report 50-388/98-004-00. This report describes an event in which sample and vent flow estimates were not performed within the time limits as required by Technical Specification 3.3.7.11, ACTION 113, when the Reactor Building Ventilation Monitoring System was out of service. Technical Specification action states, in part, that effluent releases may continue for up to 30 days, provided the flow rate is estimated at least once per 4 hours. The sample and vent flows were estimated 30 minutes past the required time. This constitutes a reportable condition per 10CFR50.73(a)(2)(i)(B).

G. J. Kuczynski
